

MSCEIT Branch 4 scoring program patch for use outside of the U.S. – A patch exists to allow use of the MSCEIT Branch 4 scoring program in countries outside of the U.S. that use commas instead of decimals for numeric notation. The patch is a replacement application file. The file, MSCEIT\_Branch\_4, provided for download here, should be copied and pasted into the appropriate location in the directory containing the program files for the MSCEIT Branch 4 scoring program. This file replaces the existing one with the same file name (MSCEIT\_Branch\_4). To maintain the option of having the program revert to its original set-up, the user may wish to copy and save the original MSCEIT\_Branch\_4 file in a separate directory location outside the MSCEIT scoring program files. The following directory tree identifies the location for inserting the replacement file: C:/Program files/Multi-Health Systems/MSCEIT Branch 4/MSCEIT\_Branch\_4
